

For Our Children's Ultimate Success

PROJECT FOCUS

Project FOCUS is a full service partnership wraparound program, that provides bilingual and culturally appropriate case management, mental health services, and other supportive services such as access to basic resources for children, transitional aged youth, and their families. The goal of Project FOCUS is to “do whatever it takes” to support participants in their recovery while promoting success in school, employment, safety and wellness. Our rehabilitation activities provide a great opportunity for youth to socialize as well as gain essential independent living skills to address their own needs of recovery.

“Family, like branches in a tree, we all grow in different directions,
yet our roots remain as one.”

– Unknown

Project FOCUS is a part of the Asian Pacific Island Behavioral Health Collaborative (APIBHC). The program has been established since 2007 and is dedicated to enhancing health, social and economic well-being to those who are a part of the under-served populations of Orange County, CA.

Funded by the OC Health Care Agency.
